

EXPLORERS LEVEL · SEMESTER 1

My Helpful Robot

Student Workbook

Code is instructions we give in order — to help, create, and solve.

Name: _____

THEORY

Code Is Instructions In Order

A **computer** only does exactly what we tell it. We give it **instructions** — and the **order** matters!

Read with your teacher: What happens if you put your socks on **after** your shoes?

Steps go in order

Number these boxes 1, 2, 3 to make a jam sandwich the right way.

1

draw here

2

draw here

3

draw here

Blocks we use:

Start on Green Flag Start on Tap Move Right Move Up Hop Say Pop Repeat

Words we are learning

- **Instruction** — one thing we tell the computer to do.
- **Order** — which step comes first, next, and last.
- **Trigger** — a start block, like Start on Tap or Start on Green Flag.
- **Debug** — to find and fix a mistake.
- **Smart helper** — a computer that follows instructions, like a voice assistant.

Name: _____ Date: _____

Put It In Order

The robot needs to tidy up. Number the boxes **1, 2, 3** and draw the steps in the right order.

1 draw here	2 draw here	3 draw here
-----------------------------------	-----------------------------------	-----------------------------------

Now you try: draw one more helpful step.

Name: _____ Date: _____

Which Block Starts It?

A yellow **trigger** block starts the code. Circle the block that starts the code when you **tap the robot**.

Start on Tap

Say

Move Right

Match the block to what it does

Start on Green Flag	makes the robot go to the right
Move Right	shows a speech bubble
Say	plays a sound
Pop	starts the code

Draw a line from each block to what it does.

Name: _____ Date: _____

My Chore Steps

Pick a real chore your robot will do. Draw it in **order** — first, next, last.

1 draw here	2 draw here	3 draw here
-----------------------------------	-----------------------------------	-----------------------------------

My chore is: _____

Name: _____ Date: _____

Spot The Bug

This robot's steps are out of order — that is a **bug**. Circle the step in the wrong place.

1	Drop the toys in the bin
2	Move to the toys
3	Move to the bin

Fix it: write the steps in the right order.

Name: _____ Date: _____

PROJECT

My Helpful Robot — Plan

You will code a robot that does one real chore. Plan it here first.

1. What chore will my robot do?

2. Which blocks will I use? (circle)

Start on Tap

Start on Green Flag

Move Right

Move Up

Hop

Say

Pop

3. My robot's steps, in order — draw them:
