

EXPLORERS LEVEL · SEMESTER 3

Recycling Sorter

Student Workbook

Code can help us make good choices.

Name: _____

THEORY

Computers Can Check And Decide

A **rule** tells the computer what to do: *if this happens, then do that*. When we sort, we put things into **groups**. Recycling right helps the planet.

Talk with your teacher: What bin does a banana peel go in?

Sort into groups

Draw one thing for each bin: Compost, Paper, Plastic.

1 draw here	2 draw here	3 draw here
--	--	--

Blocks we use:

Start on Green Flag Start on Bump Move Right Move Left Say Pop Repeat

Words we are learning

- **Sort** — put things into groups.
- **Rule** — if this, then that.
- **Start on Bump** — starts the code when two characters touch.
- **Feedback** — “Yes!” or “Try again.”
- **Recycle** — turn old things into new things and help the planet.

Name: _____ **Date:** _____

Sort It Right

Draw a line from each item to the correct bin.

Banana peel	Paper bin
Newspaper	Plastic bin
Water bottle	Compost bin

Careful — match each item to where it really goes!

Draw one more item and the bin it belongs in:

Name: _____ Date: _____

When They Bump

Circle the block that starts the code when **two characters touch**.

Start on Bump

Say

Move Right

Finish the rule: When the bottle bumps the Plastic bin, Say...

Draw the bottle going to the right bin:

Name: _____ **Date:** _____

Count The Good Sorts

Colour one box for each correct sort. Then write the number.

How many did you sort right? Write the number:

Counting our correct sorts is using math in our game.

Name: _____ **Date:** _____

I Can Recycle

Draw something you will recycle at home, and say why it matters.

I can recycle:

Name: _____ Date: _____

PROJECT

Recycling Sorter — Plan

You will build a game that sorts items into the right bins. Plan it here first.

1. Which items will I sort? (draw or write)

2. Which bins?

3. Which blocks will I use? (circle)

Start on Green Flag

Start on Bump

Move Right

Say

Pop

4. Draw my game:
